SUMMARY

I am a former Wall Street Immigration Paralegal. In my prior career, I spent 6+ distilling technical concepts from Software Engineering, and conveying them in an accessible manner to governments. Inspired by the work of Software Engineers, I changed career paths to pursue Front-End Development. I thrive in fast and dynamic environments and am comfortable engaging across industries to pick up technical concepts.

TECH SKILLS

HTML5

CSS3

JavaScript

React

jQuery

Firebase

Git Version control

VS Code

Bloomberg Terminal

Excel (Pivot Tables & Pivot Reporting)

ADDITIONAL SKILLS

Best practices for modern web development

Website accessibility requirements

Presentation/Public Speaking

Legal Writing & Research

PROJECTS

Tense Match

An ESL matching game of verb tenses

JavaScript, jQuery, HTML5, CSS, Sass, Responsive;

1st ever JavaScript project! I built it for my mother, who is an ESL Learner. I wanted it to be useful to others in ESL.

Abbiocco

A vegan and vegetarian recipe generator.

React, Dom Manipulation, CSS, Sass, Responsive;

As a vegetarian, I wanted to build a recipe generator that I could use everyday! It is also useful to users with allergy and dietary concerns.

Superfoods Navigator

A nutrition facts generator.

React, Firebase Database, CSS, Sass, API mgmt;

This was a Group-Programming Project. This was a great learning experience because others had strengths that I did not and I was able to learn by seeing their approach to solving a problem.

Are they working in?

App to identify whether current date is a working day or a national holiday in over 200 countries.

JavaScript, jQuery, HTML5, CSS, Sass, API mgmt;

This was a Pair-Programming project. Working with a classmate allowed us to lean on each other's strengths. We were also able to discover new solutions together.
